# RADIUS Release 961029

October 29, 1996

---

This release note describes product corrections included in RADIUS software version 961029. Use this release note in conjunction with your RADIUS documentation. To use this release note:

Obtain the version 961029 binary file from Ascend anonymous FTP server (ftp.ascend.com). If you need Technical Assistance, contact Ascend in one of the following ways:

- In the United States, call (800) 272-3634
- Outside the United States, call (510) 769-6001
- Customer Support BBS by modem, dial (510) 814-2302

## Corrections in 961029

<i>TR 1544</i>	<i>Radius Accounting does not work in Radius-961015.....</i>	<i>1</i>
<i>TR 1551</i>	<i>Problems compiling RADIUS with HP's CC compiler and ACE.....</i>	<i>1</i>
<i>TR 1553</i>	<i>Errors compiling RADIUS and ACE - radius-961015 .....</i>	<i>1</i>

---

*TR 1544*

Radius Accounting does not work in Radius-961015

The first accounting request (after each reset) sent from the MAX to Radius is acknowledged. Any subsequent requests sent by the MAX do not get any response. The radif debug command on the MAX just shows the same accounting request being sent over and over again, although the radiusd debug screen does not show any accounting requests after the initial request.

---

*TR 1551*

Using HP's CC compiler, RADIUS accounting with ACE causes RADIUS to hang on 961015

When using HP's CC compiler, with the ACE extensions, both RADIUS-960919 and RADIUS-961015, hang when Accounting is enabled.

---

*TR 1553*

Errors compiling RADIUS and ACE - radius-961015

When compiling RADIUS-961015, errors were encountered if ACE was specified.

---
